Education

Ph.D. in Physics, Bennett University

2022–Ongoing

- Thesis: *Deciphering Anomalous Results in Particle Physics using Statistical and Machine Learning Tools*
- Advisor: [Dr. Subhadeep Mondal](#)

M.Sc. in Physics, University of Delhi

2018–2020

- Dissertation: *Solitary Waves and Solitons: Some Non-Perturbative Semi-Classical Methods in Quantum Field Theory*
- Advisor: [Prof. Debajyoti Choudhury](#)

B.Sc. (Honours) in Physics, University of Delhi

2015–2018

- Specialization: Theoretical Physics

Research Experience

Junior Research Fellow (Visitor), Bangabasi Evening College, University of Calcutta
Present

2024–

- Project: A “Deep” Analysis Framework for Physics Beyond Standard Model (CRG/2022/003208)
- Principal Investigator: [Dr. Sunando Kumar Patra](#); Co-Principal Investigator: [Dr. Subhadeep Mondal](#)

Research Profile

My research lies at the interface of particle-physics phenomenology, statistical inference, and machine learning. I develop computational methods for exploring and constraining Beyond the Standard Model (BSM) parameter spaces and for extracting new-physics signatures from collider data, with particular emphasis on efficient posterior inference, jet tagging, and scalable ML architectures.

Research Interests

- **BSM phenomenology:** collider studies of non-minimal Higgs sectors (2HDMs and triplet extensions), seesaw models, RPV-MSSM, and 3-3-1 models, with emphasis on constraining model parameter spaces using experimental data.
- **Machine learning for collider physics:** ML-driven jet-tagging methods for identifying and probing new-physics signatures, including computationally efficient and lightweight architectures.
- **Statistical and generative inference:** posterior inference using normalizing flows and related ML methods, including approaches that accelerate traditional MCMC and nested-sampling workflows.

Research Skills

- **Particle phenomenology:** SARAH, SPheno, MadGraph, Pythia, Delphes, HiggsTools, OptEx
- **Statistical inference:** Bayesian inference, MCMC, nested sampling, normalizing flows, conditional flows, posterior estimation
- **Machine learning:** PyTorch, TensorFlow, Mathematica (MXNet); MLPs, autoencoders, VAEs, CNNs, GNNs, attention mechanisms, transformers
- **Scientific computing and data analysis:** Python, C/C++, Fortran, Mathematica; ROOT, NumPy, pandas, matplotlib

Selected Talks and Seminars

- "The Shape of Physics: Bayesian Inference, Jet Geometry, and the Architectures for Discovery", HEP-Theory Division Seminar, Argonne National Laboratory, 12 May 2026 (virtual).
- "Efficient Machine Learning for Physics: Solving Inverse Problems and Identifying Particles", HEP Seminar, Department of Physics, Indian Institute of Technology Kanpur, 9 December 2025.

- “Bayesian Model Comparison: The Battle Royale of New Physics Models”, PHOENIX 2025, Indian Institute of Technology Hyderabad, 9–11 July 2025.
- “Optimizing Probes of New Physics Models: Generative Algorithm-Driven Nested Sampling for Parameter Estimation”, From Big Bang to Now: A Theory-Experiment Dialogue, SRM University AP, 23–25 January 2025.
- “Boosting Beyond Standard Model Searches: ML-Enhanced Nested Sampling for Rapid Parameter Estimation”, XXVI DAE-BRNS High Energy Physics Symposium, Banaras Hindu University, 19–23 December 2024.
- “Seeking Higgsino-like Neutralino guided by GNN-based Top Tagger”, XXVI DAE-BRNS High Energy Physics Symposium, Banaras Hindu University, 19–23 December 2024.

Selected Conferences, Workshops & Schools

- PHOENIX 2025, IIT Hyderabad, 9–11 July 2025.
- Current Trends in Particle and Astroparticle Physics, IACS Kolkata, 30–31 January 2025.
- From Big Bang to Now: A Theory-Experiment Dialogue, SRM University AP, 23–25 January 2025.
- XXVI DAE-BRNS High Energy Physics Symposium, BHU Varanasi, 19–23 December 2024.
- Machine Learning for Particle and Astroparticle Physics, IoP Bhubaneswar, 1–13 July 2024.
- Workshop on Dark Matter and Astroparticle Physics, IoP Bhubaneswar, 7–9 August 2024.
- SANGAM@HRI 2024, HRI Prayagraj, 7–16 March 2024.
- Statistical Methods and Machine Learning in High Energy Physics, ICTS-TIFR, 28 August–8 September 2023.
- SAGEX School in Amplitudes, 9–13 August 2021.
- Theoretical Physics School @ IIT Gandhinagar, 7–11 June 2021.

Teaching

- Tutorial instructor: Normalizing Flows and Simulation-Based Inference, ML4HEP V3 2025, IISER Kolkata.
- Undergraduate tutorials: Newtonian Mechanics and Electrodynamics.
- Undergraduate laboratory instruction: Solid State, Optics, Mechanics, and Electrodynamics.
